

Malott Homework Set 3 Chapter 21 Homework

1-51 to 5-55 Match the correct description to the correct term.

- A. A stimulus that produces the unconditioned response without previous pairing with another stimulus.
- B. A learned response elicited by the presentation of a conditioned stimulus.
- C. A unlearned response elicited by the presentation of an unconditioned stimulus.
- D. Establishing a conditioned stimulus by pairing a neutral stimulus with an already established conditioned stimulus.
- E. A stimulus that acquires its eliciting properties through previous pairing with another stimulus.

1-51. \_\_\_\_ Conditioned stimulus p. 356

2-52. \_\_\_\_ Unconditioned stimulus p. 356

3-53. \_\_\_\_ Higher-order conditioning p. 363

4-54. \_\_\_\_ Unconditioned response p. 356

5-55. \_\_\_\_ Conditioned response p. 356

6-56 to 11-61. fill in the table on the distinctions between respondent and operant conditioning p. 359

Traditional Distinctions Between Respondent and Operant Conditioning		
<b>Feature</b>	<b>Respondent Conditioning</b>	<b>Operant Conditioning</b>
<b>Procedure</b>	6-56	7-57
<b>Response occurrence</b>	8-58	9-59
<b>Response Control</b>	10-60	11-61

- A. Generally “involuntary” (two questions can be answered with “A”)
- A. Response to stimulus need not occur before conditioning
- B. Neutral stimulus and unconditioned stimulus precede response.
- C. Response must occur to be conditioned
- D. Generally “voluntary”
- E. Reinforcing or punishing consequence follows the response.
