

Malott Homework Set 3 Chapter 9 homework

1-51 to 5-55 Match the correct definition with the correct term

- A. A stimulus, event, or condition that is aversive; though not as a result of pairing with other aversive conditions.
- B. Consuming a substantial amount of a reinforcer temporarily decreases relevant learning and performance.
- C. If one activity occurs more often than another, the opportunity to do the most frequent activity will reinforce the less frequent activity.
- D. A stimulus, event, or condition that is a reinforcer, though not as a result of pairing with another reinforcer.
- E. Withholding a reinforcer increases relevant learning and performance.

- 1-51. \_\_\_\_ Unlearned reinforcer. Pg. 166
- 2-52. \_\_\_\_ Satiation Pg. 168
- 3-53. \_\_\_\_ Unlearned aversive condition. Pg. 166
- 4-54. \_\_\_\_ Deprivation. Pg. 167
- 5-55. \_\_\_\_ Premack principle. Pg. 175

6-56. A procedure that affects learning and performance with respect to a particular reinforcer or aversive condition is a definition of? Pg. 170

- A. Unlearned reinforcer
- B. Satiation
- C. Deprivation
- D. Establishing operation
- E. Premack principle

7-57. In the example in the book of Rudolph the rat who had no water for 23 hours before each session in the skinner box and he rapidly learned lever pressing and got a drop of water every time he pressed the lever. But when they came in on Monday they noticed that the water bottle was on his home cage and he has been drinking his fill all weekend and when you put him in the skinner box he barely touches the lever, and doesn't even bother licking the water dripper on a few of those times. This is an example of what? Pg. 171.

- A. Deprivation
- B. Conditioned Reinforcer
- C. Premack principle
- D. Standard operations
- E. All of the above

8-58. In the example in the book of the Rosa Parks Academy and Jimmy, when Jimmy would touch his nose Eve would give him a quarter size spoonful of cereal and skimmed milk. Why do you think Eve used such a tiny sized reinforcers ( one quarter sized teaspoons of cereal and milk, why didn't she give Jimmy a man sized teaspoonful?  
Pg. 168

- A. Because of the satiation principle
- B. She doesn't want Jimmy's learning to get too dependent on cereal
- C. Jimmy doesn't deserve more
- D. Because of the shaping principle
- E. All of the above

9-59. Deprivation at the time of reinforcement increases the impact the delivery of a single reinforcer has on the subsequent frequency of the reinforced response is a definition of? Pg. 168

- A. Performance
- B. Learning
- C. Premack principle
- D. Establishing operations
- E. None of the above

10-60. Deprivation at the time to perform a response increases the frequency of that previously reinforced and thus previously learned response, this is a definition of? Pg. 168

- A. Learning
- B. Premack principle
- C. Performance
- D. Establishing operations
- E. None of the above
